

LINA MARÍA MONTAÑO RAMÍREZ

Backend Developer | Google Women Techmakers Ambassador

codelinamaria@gmail.com • linkedin.com/in/calypsobronte • github.com/calypsobronte • Medellín, Colombia

PROFESSIONAL PROFILE

Backend Developer with over 5 years of experience in backend architectures, high-availability REST APIs and cloud solutions. I have worked at MercadoLibre and Sinapsis leading cybersecurity projects (Pumba with VirusTotal), AWS infrastructure optimization and development of systems for government entities in Colombia, Paraguay and Chile. As an official Ambassador of Google Women Techmakers and leader of technological communities, I combine technical expertise with leadership and mentoring. Currently pursuing a Software Development Technology degree at SENA. Available for paid internships or Backend positions.

PROFESSIONAL EXPERIENCE

Backend Developer (Go / Python / Cloud) — MercadoLibre | January 2024 – Present (1 year 11 months)

- Design and implementation of high-availability REST APIs using the internal Fury framework. Led the Pumba project: a URL security analysis system integrated with VirusTotal for real-time risk classification.
- WhiteClean Project: Revalidation and cleaning of allowlists with no traffic in AWS, optimizing security and costs. Implementation of access rules engine (Timon Rules). Active vulnerability audits and risk mitigation.

Backend Developer (Node.js / TypeScript / DDD / AWS) — Sinapsis | July 2022 – December 2023 (1 year 6 months)

- Development of backend architectures using Domain-Driven Design and clean code. Creation of data models and databases in AWS RDS.
- High-impact government projects: Denuncias Paraguay, Congreso de Chile, Virtual Congress of Chile, Aresep with Blockchain, Infradigital and SafeCities. Infrastructure as Code in AWS and Azure.

Fullstack & Backend Developer — PLM Group (Feb 2021 – Jun 2022) and Ozel Producciones (2020 – 2021)

- PLM Group: Fullstack development for critical infrastructure projects (El Dorado Airport, Lima Airport, Casa Magna, Pintuco, Haceb).
- Ozel Producciones: Interactive streaming platform with real-time control center using React, Node.js, MongoDB and Python for clients such as Reebok and Colgate.

TECHNICAL SKILLS & COMMUNITY LEADERSHIP

Languages & Frameworks: Node.js (Express), Python, Go, TypeScript, Vue.js, React.js

Databases: PostgreSQL, MySQL, MongoDB, SQL Server, AWS RDS

Cloud & DevOps: AWS, Google Cloud (GCP), Microsoft Azure, Docker, Git & GitHub

Architecture & Practices: Domain-Driven Design (DDD), Clean Code, REST APIs, Application Security, Data Modeling

Google Women Techmakers official Ambassador — Promotion of diversity, equity and inclusion in technology

Community Leader: NodeCo, JWD Medellín and Pioneras Devs

Technical content creator: TikTok, Twitch and YouTube

Podcaster: CaminoDev — interviews and content about software development and tech career

Active mentor in developer communities and technical training

LANGUAGES

- **Spanish:** Native
- **English:** Elementary (A2)

I don't speak English fluently yet, but I can comfortably read technical documentation, understand codebases, write code and comments in English, and communicate effectively in writing when needed.

EDUCATION

Software Development Technology — SENA (In progress) | **Software Development Technician** — SENA (2022)

Available for paid professional internships from SENA and Backend Developer opportunities (remote or on-site in Colombia)
